SUMMARY

I'm learning to be a web developer with a focus on the front-end part of websites. I'm always up for new challenges to improve my skills. Though college wasn't the best time, it's motivating me to succeed in the ever-changing world of web development.

EDUCATION

Universiti Teknikal Malaysia Melaka
Bachelor of Computer Science (Software Development)
October 2020 - Present

UiTM Segamat
Diploma in Computer Science
June 2017 – January 2020

SKILLS

Technical Skills

- Technologies & Frameworks:
  - Proficient in HTML, CSS, JavaScript, MySQL, Bootstrap, Tailwind CSS, Svelte
  - Familiarity with Laravel, C# (ASP.NET), Vue.js, jQuery

- Deployment & Other:
  - Familiar with version control using Git
  - Familiarity with software testing methodologies and practices
  - Proficient in using project management tools like Trello for task organization and collaboration

Professional Skills

- Strong problem-solving abilities
- Effective communication and teamwork skills
- Detail-oriented approach to tasks
- Ability to handle constructive criticism and iterate on solutions
- Self-motivated and driven to exceed goals

PROFESSIONAL EXPERIENCE

Skywalker Technology Sdn Bhd
Intern (Front-End Developer) | October 2023 – March 2024

- Translated design concepts into functional and aesthetically pleasing websites.
- Prioritized user-friendliness and responsiveness across a diverse range of devices, aiming for an optimal user experience.
- Utilized Svelte's component-based architecture for standardization in design.
- Engaged in gaining a deeper understanding of Web3 technology, staying at the forefront of industry trends.

Freelance (Fintech Capital)
Software Tester | April 2020 – November 2020

- Collaborated with my internship supervisor to perform comprehensive testing on various products, including the Bxcess Android application and Lunapay user site
- Executed testing procedures to identify and document issues, ensuring product quality and user satisfaction
- Communicated closely with development teams to report identified defects and facilitate timely resolutions

Fintech Capital
Intern (Web Developer) | July 2019 – September 2019

- Gained hands-on experience in web development, learning to utilize Laravel and Vue.js for the first time, while applying MVC architecture with Laravel
- Created comprehensive test cases and authored a user manual for Mayamall (an online marketplace developed by Fintech Capital), enhancing product quality and user experience
- Acquired proficiency in using GitLab, enhancing project file management and collaboration efficiency for the development team
